Zimmer Biomet Announces CE Mark Certification for Persona® Revision Knee System

Nov 18, 2024

WARSAW, Ind., and ZURICH, Nov. 18, 2024 /PRNewswire/ -- Zimmer Biomet Holdings, Inc. (NYSE: ZBH and SIX: ZBH), a global medical technology leader, today received the CE Mark for its Persona® Revision Knee System. This addition to the Persona family builds on Zimmer Biomet's commitment to personalized solutions, providing surgeons with advanced tools for revision knee arthroplasty.

"After the successful introduction of Persona Revision Knee in the United States and other markets, the CE Mark certification and commercial launch extends its availability significantly so that more surgeons have access to an innovative solution that can enhance patient outcomes," said Joe Urban, President, Knees at Zimmer Biomet.

The Persona Revision Knee offers a personalized fit and optimized function for patients undergoing revision knee surgery. The modular system allows for intraoperative flexibility, so surgeons can address a wide range of complex cases with precision and ease. The system features Zimmer Biomet's proprietary Trabecular Metal™ Technology, which promotes long-term bone in-growth and improves implant fixation.[1] [2] [3]

"We are excited to introduce the Persona Revision Knee to expand our industry-leading knee portfolio and to provide our customers and their patients with a system that is truly personalized, adaptable, and designed to restore natural knee motion," said Wilfred van Zuilen, Group President EMEA, Zimmer Biomet.

The Persona Revision Knee system is the leading product in the over $700 million U.S. knee revision market.[4] The system's anatomic components and intuitive instrumentation streamline the revision surgery process, reducing complexity while improving precision.[5 6 7 8]

Surgeons can make intraoperative adjustments to achieve optimal alignment and fit for each patient, which can lead to improved stability, mobility, and implant longevity.

This launch supports Zimmer Biomet's Mission to alleviate pain and improve the quality of life for patients worldwide through innovative and clinically proven solutions.
