

Zimmer Biomet Publishes 2023 Sustainability Report

May 06, 2024

Sustainability report highlights progress in product quality and safety, environmental and greenhouse gas emissions goals, and team member engagement and development

WARSAW, Ind., May 6, 2024 /PRNewswire/ -- Zimmer Biomet Holdings, Inc. (NYSE and SIX: ZBH), a global medical technology leader, today published its 2023 Sustainability Report which provides an overview of the company's environmental, social and governance (ESG) program, progress, and accomplishments. The report outlines Zimmer Biomet's formal commitment with Science Based Targets initiative (SBTi) to reach Net-Zero greenhouse gas (GHG) emissions by 2050 and aligns with the Sustainability Accounting Standards Board (SASB) framework and the Task Force on Climate-related Financial Disclosures (TCFD).

As detailed in the report, Zimmer Biomet is committed to being a good corporate citizen and a leader in responsible, ethical business practices. Key highlights include:

- Achieving the highest ever employee engagement levels since our 2015
 merger. Our company-wide engagement index score increased a remarkable 7 points over 2022
 results, with improved scores for 100% of the indicators.
- Furthering our commitment to integrating health equity into our business strategy. Our new Community Centered Care (C3) framework aims to increase patient access to

quality care within underserved communities. The framework implements a multi-pronged approach that engages the health network to collaborate on insights and innovation to improve patient outcomes.

- Continuing to make progress toward reaching our SBTi-approved goals of reducing carbon emissions. We reduced our 2023 Scope 1 and 2 (market-based) carbon emissions by more than 7% from our 2022 levels. Additionally, Zimmer Biomet is working with suppliers to increase transparency and improve environmental performance.
- **Expanding Zero Waste to Landfill (ZWTL) initiative.** The flagship program aims to have no waste sent directly to landfill for disposal. In 2023, we moved this global initiative forward with 18 sites now internally certified, representing 60% of our in-scope global network.
- Zero pending FDA Warning Letters as of December 2023. As part of our commitment to drive greater accountability for compliance with, and sustained improvements in, our global quality system, we cleared our single outstanding FDA Warning Letter in December 2023.
- Continuing our focus on quality management programs and performance. For the second year in a row, Zimmer Biomet maintained fewer than 10 product recalls in the year.

Ivan Tornos, President and CEO of Zimmer Biomet, commented, "I am incredibly proud of the progress we made this year in advancing sustainability initiatives across all facets of our business. From reducing our carbon footprint and minimizing waste to increasing engagement within our workforce, we have achieved key milestones that demonstrate accountability and growth. Our Sustainability Report serves as a roadmap for our ongoing efforts to deliver value for our patients, customers and team members."
