

# Zimmer Announces Launch of Viewline Retractor System, Tube Retraction System and Posterior Instrument Set for Minimally Invasive Spinal Surgery

Oct 31, 2013

## State-of-the-Art Retraction System Offers a Comprehensive Tube and Retractor Blade Selection for MIS Posterior Access Spine Surgery

MINNEAPOLIS, October 31, 2013 /PRNewswire/ -- Zimmer Spine, Inc. today announced that the Company has launched the *Viewline* Tube Retraction System, *Viewline* Retractor System, and *Viewline* Posterior MIS Instrument Set to facilitate exposure, retraction, decompression and disc preparation for MIS TLIF/PLIF/PLF and microdiscectomy procedures.

The *Viewline* Tube Retraction System features 40mm through 120mm tube length options, as well as three tube diameters to accommodate a range of spinal anatomy. The *Viewline* Retractor System offers 50mm through 120mm blade options with 30° of blade pivoting for maximum access through a smaller incision, as well as two, three or four blades that move independently for maximum customization. Both *Viewline* Systems feature an innovative angled attachment arm to minimize tube profile, a rotating table clamp providing rigid stabilization and a cool LED light source to improve visualization while reducing heat exposure during surgery.

"For the spine surgeon who performs minimally invasive TLIF and PLIF procedures, the *Viewline* Systems provide comprehensive versatility for MIS posterior access," said Steve Healy, President, Zimmer Spine. "Combined with the *PathFinder NXT*® Minimally Invasive Pedicle Screw System and the *TM Ardis*® Interbody System, these state-of-the-art retractor systems enhance Zimmer Spine's complete, minimally invasive TLIF and PLIF procedural solution."
