

Zimmer Introduces New CLS® Brevius™ Hip Stem with Kinectiv® Technology in the United States

Dec 08, 2011

New technology enables surgeons to better match individual patient needs during hip replacement

WARSAW, Ind., Dec. 8, 2011 /PRNewswire/ -- Zimmer Holdings, Inc. (NYSE: ZMH; SIX: ZMH), a global leader in musculoskeletal care, today announced the availability of its *CLS® Brevius*™ Hip Stem with *Kinectiv®* Technology in the United States. This new technology enables surgeons to better match patients' individual anatomies with modular neck options designed for independent, intraoperative adjustments.

"Following its introduction in Europe earlier this year, we have received excellent clinical feedback on the performance of the new *CLS Brevius* Stem," said Jeff McCaulley, President, Zimmer Reconstructive. "Incorporating *Kinectiv* Technology to this new stem provides unparalleled intraoperative flexibility for our customers to restore their patients' anatomies."

The new hip stem is based on the Zimmer *CLS Spotorno®* Stem, one of the most reliable implants worldwide with more than 25 years of clinical use. Since its introduction in the 1980s, the *CLS Spotorno* Stem has been used in more than 560,000 total hip arthroplasty procedures around the world. The *CLS Spotorno* Stem is characterized by excellent primary and rotational stability in uncemented total hip arthroplasty.

Building on this history of clinical success, the new *CLS Brevius* Hip Stem provides greater intraoperative flexibility with the addition of *Kinectiv* Technology. *Kinectiv* Technology offers a wide array of head center locations, enabling independent, intraoperative control of leg length, offset and version for a more accurate restoration of the patient's natural anatomy. The *CLS Brevius* Stem with *Kinectiv* Technology is shorter than conventional stems, providing greater bone conservation compared with the original *CLS Spotorno* Stem.

For more information about the advantages of CLS Brevius Stem with Kinectiv Technology, please visit

About the Company

Founded in 1927 and headquartered in Warsaw, Indiana, Zimmer designs, develops, manufactures and markets orthopaedic reconstructive, spinal and trauma devices, dental implants, and related surgical products.
